

CGM DIRECT SCANNING INTEGRATION FUNCTION

After your Implementation Consultant has notified you that your system has been activated, you will need to complete the *CGM Direct Scanning Integration* function located on the *System, Database Maintenance Menu, Integrations, CGM webTOOLS* menu.

Users will not be able to use *CGM Direct Scanning* until their **User Code** has been added in the *CGM Direct Scanning Integration* function.

Upon accessing this function, any **Users** previously added will be listed in the **Users** section of the screen.

- **Add a User Code:** Select a **User** from the **User Code** list and click **Add**. The **User** will be added to the list displayed in the **Users** section.
- **Remove a User:** Click the **(remove)** link to the right of the User's name.

The screenshot shows a software interface titled "CGM Direct Scanning Integration". At the top right, it says "CompuGroup Medical US EASTSIDE MEDICAL (1)". Below the title, a message reads "You are authorized to add up to 5 users". There is a dropdown menu labeled "User Code" and a "Add" button. A table below lists "Users (4 selected)":

User	(remove)
APPLE TEST (APPLE)	(remove)
DORA (DMR)	(remove)
DW Alistair (DWE)	(remove)
MELANIE BROOKS (MEL)	(remove)

At the bottom right are "Save", "Cancel", and a printer icon.

Click **Save** when you are done adding or removing Users.

Next, each User will need to complete the *Workstation Installation Instructions* document before using *CGM Direct Scanning*.

Note: You only need to add the Users from within a single database, since the *User Code Table* is a system-wide table. The User will have access to *Direct Scanning* in any database they have access to.
