Reports

User Productivity Report to Excel (Reports > User Productivity Report to Excel)

The report has been modified to reflect that certain columns are calculated based on the Accounting Date of the activity performed by the user, rather than the Activity Date. An asterisk (*) will now be printed in each column heading and a new message will be printed in the footer of the report stating, "The column is currently based on the Accounting Date, but will be modified in a future release to be based on the date the activity was performed."

Superbill Inquiry (Schedule > Superbill Inquiry)

To simplify the search process regardless of the number format, we've added enhanced search functionality. You can now specify whether the superbill number 'equals,' 'begins with,' or 'contains' the number you enter.

Equals is the default search option selected, as this is how the function has worked in the past. If you select **Begins with** or **Contains**, a new screen will be displayed showing all the superbill numbers that match your search criteria. You can click anywhere on the row to view the details for a superbill.
