#### Change Patient Data – CGM webSCAN Action Column Button - \*\*\*CGM webSCAN™ Clients Only – Patient Collector version\*\*\*

The following enhancements have been made:

- The front and back of driver's licenses will be scanned and saved as one combined image.
- When you click the **CGM webSCAN** Action Column button, it will display "*Please wait...*" on the button and be disabled. When the CGM webSCAN scanning process is complete, the **CGM webSCAN** button will change back to display **CGM webSCAN** and be enabled. This will prevent potential attempts to start multiple instances of CGM webSCAN.
- During the CGM webSCAN scanning process, the **Save** button on the *Patient Name and Address*, *Guarantor* and *Insurance Policy Information* screens will be disabled. When image processing is complete and the CGM webSCAN scanning window is closed, the **Save** button will be re-enabled. This change will prevent Users from clicking **Save** before the image(s) has been saved and the screen updated.

**Note:** If you are currently on the *CGM webSCAN Express Service Application* version and would like to upgrade to the enhanced *Patient Collector* version, contact Customer Service to initiate the process.
